Definition of a SwifTest Lite User

A Lite User that is testing as part of a project team will be able to execute tests and even make some changes to the tests that are available to them. A Lite User might, alternatively, be a quality assurance manager, testing manager or project manager that simply wants to review and monitor the tests being run. Lite Users have access to the following non-specific features of Dimension SwifTest:

- Access to SwifTest on the Dimension Hub
- Ability to download, install and sign into the SwifTest Client
- Secure User Passwords
- Multi-Subscription Support
- Secure Data
- Private Projects
- Positive and Negative Testing (results)
- Unattended Execution (results)
- Online Self-Paced Learning Materials
- Email Support
- Admin User Access

Lite Users do not have access to these features/functionalities:

- Creating, editing, copying or deleting Projects, Scenarios, Tests or Test Actions (except for editing parameters of existing actions)
- Editing/changing an action's position in a test
- Creating, editing, copying or deleting Queues, Repositories (or their data) or Schedules
- Adding, editing or deleting Tests within a Queue
- Creating, editing, copying or deleting Metadata Tags
- Calls to Orchestrations or other interoperability (OpenAPI & CommandLine)
- Copy/Move Functionality
- "Tools" options (configure Metadata)
